

Develop The Web Application Using Node-RED

Team Id	PNT2022TMID31392
Title	Hazardous Area Monitoring for Industrial Plant using IoT

Node red flow

Function blocks

The screenshot shows the Node-RED web interface. On the left, the 'function' node is selected from the palette. The main workspace displays a flow with an 'IBM IoT' node connected to two 'function' nodes. The 'Edit function node' dialog is open, showing the 'On Message' tab with the following code:

```
1 msg.payload = msg.payload.temp;
2 global.set('t',msg.payload)
3 return msg;
```

The right sidebar shows the 'Info' tab with a search for 'function: 815cba7c7af38e65'. The node details show the ID '815cba7c7af38e65' and the type 'function'.

The screenshot shows the Node-RED web interface with a different code snippet in the 'Edit function node' dialog. The 'On Message' tab contains the following code:

```
1 msg.payload = msg.payload.humid;
2 global.set('h',msg.payload)
3 return msg;
```

The right sidebar shows the 'Info' tab with a search for 'function: 9798420db1160734'. The node details show the ID '9798420db1160734' and the type 'function'. At the bottom of the sidebar, there is a note: 'Show the Info tab with ctrl-g or the Debug tab with ctrl-g d'.
